

Yijiang Huang

Postdoctoral fellow at ETH Zurich

Office: Wasserwerkstrasse 12, 8092 Zurich, Switzerland

Email: yijiang.huang@inf.ethz.ch URL: <https://yijiangh.github.io>

Research interests

Computational planning methods that coordinate robots, humans, and resources to enable the efficient construction of sustainable structural solutions.

Education

- | | | |
|-----------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------|
| 9/2018 - 9/2022 | Ph.D. in Building Technology
Dissertation: <i>Algorithmic planning for robotic assembly of building structures</i>
Advised by Caitlin Mueller
MIT Presidential fellow (2018) | Department of Architecture, MIT |
| 9/2016 - 5/2018 | Master of Science in Building Technology
Thesis: <i>Automated motion planning for robotic assembly of discrete architectural structures</i>
Advised by Caitlin Mueller
MIT Presidential fellow (2016) | Department of Architecture, MIT |
| 9/2012 - 5/2016 | Bachelor of Science in Applied Mathematics | University of Science and Technology of China |

Research Experience

- | | | |
|-----------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------|
| 1/2023 - Now | Postdoctoral fellow
Developed a computational design framework for spatial bar structures with reusable swivel coupler joints; researched planning and control for cooperative mobile robotic assembly; contributed to cross-departmental research for NCCR DFAB. Supervised by Stelian Coros. | Computational Robotics Lab, ETH Zurich |
| 9/2016 - 8/2022 | Graduate research assistant
Developed planning algorithms for robotic assembly and tested them on real-world robot systems in various physical scales; developed computational matching algorithms for circular design with reused materials; collaborated with researchers at MIT, Princeton, TU Delft and ETH Zurich; published results in journal and presented findings at academic conferences and seminars; led instructions and contributed to the developments of various courses and workshops. Advised by Caitlin Mueller. | Digital Structures Group, MIT |
| 6/2019 - 8/2019 | Guest researcher
Integrated robotic planning algorithms to the open-source COMPAS-FAB framework; led hands-on workshops about the developed software. | Gramazio & Kohler Research Group, ETH Zurich |
| 2/2015 - 6/2016 | Undergraduate research assistant
Developed a sequence planning algorithm for robotic spatial extrusion; designed and built a customized extrusion hardware; led a collaboration with an architectural firm's R&D branch; published results at SIGGRAPH Asia. Advised by Juyong Zhang, Lei Yu, and Ligang Liu. | Geometry and Graphics Computing Lab, USTC |

Professional Experience

- 9/2020 - 5/2021 **Remote technical consultant** Roboticplus Inc., virtual
Bi-weekly remote meetings with the R&D team to provide technical advice on geometric feature detection, point cloud registration, and path planning of wood-cutting and welding robots.
- 7/2015 - 8/2016 **Research intern** ArchiSolution Workshop, Beijing
Research stay to develop collaborated academic research project on robotic extrusion planning. Contributed to the assembly of large-scale 3D printers. Monitor the fabrication and shipping process of a commercial 3D printed facade. Developed a robotic layer-based printing demo for clients.

Funding

- 1/2023-12/2029 **SNSF Ambizione Grant**
Project title: Computational design of skills, environment, and collaborative intelligence for assembly robots
A four-year project grant, covering around 0.6 million CHF for my salary and project spending. One of the most prestigious funding instruments for early-career researchers from the Swiss National Science Foundation (18% success rate).

Fellowships

- 1/2023-12/2025 **ETH Zurich Postdoctoral Fellowship**
208,900 CHF in salary costs + 24,000 CHF for research and travel costs, awarded to 15 individuals each year (25% success rate).
- 9/2016, 9/2018 **MIT Presidential Fellowship**
Funding for tuition (50k USD each year) and living stipend of one academic year (48k USD), with additional guaranteed TA funding coverage throughout the entire duration of study if needed. Awarded to around 110 new graduate students each year (out of 7,200 grads), selected by the Deans and Heads of Departments at MIT.
- 9/2014 - 6/2016 **USTC Outstanding Undergraduate Student Scholarship** (500 RMB/year)

Selected Software

Open-source code is available on [my website](#) for most of the publications above.

COMPAS-FAB

Contributor

A Python package for the [COMPAS](#) Framework that facilitates the planning and execution of robotic fabrication processes

pybullet_planning

Contributor

A Python package based on the pybullet physics simulation engine to provide collision checking, kinematics, and motion planning for robotics research.

ikfast_pybind

Author

A Python package for analytical robot kinematics.

connech

Author

A Python package for linear elastic analysis of spatial trusses and frames.

TopOpt.jl

Contributor

A Julia package for flexible topology optimization on continuum and truss domains.

Teaching

SEMESTER-LONG COURSES

Spring 2024

Stochasticity and Machine Learning

ETH Zurich, MAVT

Teaching assistant (1 of 10 TAs, ~ 500 students per year)

Developed tutorials for generative model and reinforcement learning. Contributed to exam questions and testing.

2019-2021

Computational Structural Design and Optimization (4.450)

MIT Architecture

Teaching assistant (~ 25 students per year)

Led weekly office hours and monitored student final projects; developed new assignments and lectures to reflect recent developments and tools in optimization and fabrication; guest lecture on optimization algorithms and discrete and combinatorial optimization. (with C. Mueller)

Spring 2018	<p>Design for Robotic Assembly (4.S48)</p> <p>Instructor (12 students)</p> <p>Designed, organized, and presented a new project-based course on architectural design for robotic assembly. Students learned the basic principles of programming an industrial robotic arm and explored creative usage of the technology. Their final projects questioned the physical precision of robots, engaged in playful human-robot interactions, and produced bespoke geometries. (with C. Mueller and J. Lavallee)</p>	MIT Architecture
	WORKSHOPS	
10/2023	<p>Task and Motion Planning for Robotic Assembly</p> <p>Co-instructor (17 students, three-day-long workshop)</p> <p>Gave lectures and led tutorial sessions. Students used the robot planning tool developed in my research to generate robot assembly program for assemblies they designed. Workshop summary. (with V.P.Y. Leung)</p>	ACADIA, hybrid
7/2020	<p>Kintsugi, Upcycling, and Machine Learning (4.181)</p> <p>Co-instructor (12 students, three-week-long workshop)</p> <p>Gave lectures and led tutorial sessions. Students used the optimal matching tool developed in my research to design new assemblies from recycled materials. (with C. Mueller, D. Marshall, D. White)</p>	MIT Architecture
10/2019	<p>Fabrication-informed design of robotically assembled structures</p> <p>Co-instructor (14 students, two-day-long workshop)</p> <p>Gave lectures and tutorials. Students used the planning system developed in my research to compute robot trajectories to assemble structures they designed. (with S. Parascho, G. Wartinger, C. Mueller)</p>	Design Modeling Symposium, Berlin
9/2019	<p>Structural Upcycling workshop</p> <p>Co-instructor (10 students, two-week-long workshop)</p> <p>Developed computational design workflow for designing structures that reuse recycled tree branches. (with F. Amtsberg, D. Marshall, K.M. Gata, C. Mueller)</p>	MIT Architecture
7/2017	<p>Parametric Architectural Design Workshop</p> <p>Teaching Assistant (13 students, one-week-long workshop)</p> <p>Mentored students on the design and construction of full-scale, load-bearing bridges, using generative computational design tools that link architectural expression with structural performance. (with C. Mueller)</p>	Tsinghua University, Beijing
7/2016	<p>Parametric Architectural Design Workshop</p> <p>Teaching Assistant (12 students, one-week-long workshop)</p> <p>Mentored students on the use of industrial robots to cut customized wood notches for the assembly of a human-scale reciprocal wood vault. (with L. Yu and Z. Liu)</p>	Tsinghua University, Beijing
	ANONYMOUS TEACHING FEEDBACK	
Fall 2019-2021	<p>Computational Structural Design and Optimization (4.450)</p> <p>A sample of anonymous feedback about my teaching assistantship is gathered below, where each quotation corresponds to a different student:</p> <p><i>"Yijiang has been the best TA I have had at MIT. He's thoughtful and thorough in his responses and feedback and seems to have a true passion for the material. Couldn't have succeeded in this course</i></p>	MIT Architecture

without him.”

”Yijiang had a very challenging job as a (sole) TA to ~31 students! He was always responsive over email and Piazza. It’s nice to know that no matter what, I could count on getting an answer to any question that came up. Yijiang is also very kind and thoughtful, and I was never worried to ask him questions in class. Great TA.”

”Yijiang is the best TA that I’ve ever had. He is so helpful and so passionate about the subject. He is so approachable and he answers questions so quickly and in such an understandable manner.”

”Amazing TA. I’ve learnt a lot from Yijiang and he definitely goes out of his way to help us, be it during or out of class. Really fortunate to have him as the teaching assistant for the class.”

Mentoring

MASTER’S THESIS ADVISOR

11/23 - 7/24	Peiyu Zeng	ETH Zurich
	Master in Robotics, Systems, and Control (ME). Thesis: Computational design of automated logistic factories (with S. Huber and S. Coros)	
5/2023 - 9/2024	Yi Hsiu Hung, Chenming Jiang	ETH Zurich
	Master in Digital Fabrication (Architecture). Thesis: Computational Design and Assembly of Infinitely Reusable Kit of Parts (with Z. Wang, A. Gheyselinck, P. Aejmelaesus-Lindström)	

MASTER’S SEMESTER PROJECT ADVISOR

2/2024 - 6/2024	Emre Altan	ETH Zurich
	Master in Robotics, Systems, and Control (ME). Semester project: Real2sim MoCap calibration for mobile robotic assembly.	

ACADEMIC YEAR UNDERGRADUATE RESEARCHERS

2017	Thomas Cook	MIT EECS Senior
	Industrial robot’s planning and simulation	
2017	Kodiak Brush	MIT ME Senior
	Thermal hotend design for robotic printing	
2017	Khanh Nguyen	MIT ME Sophomore
	Portable 3D printing control system design	

EXTERNAL COMMITTEE MEMBER

2/2023	Gabriel Vallat	EPFL
	Master thesis: Multi-agent Reinforcement Learning for Assembly of a Spanning Structure (with M. Kamgarpour and S. Parascho)	

SUMMER UNDERGRADUATE AND HIGH SCHOOL RESEARCHERS

8/2021	Research mentor, Summer Geometry Institute	Virtual, MIT
	Bonnie Magland, Cynthia Fan, Lily Kimble, Marcus Vidaurri	
	Planned, prepared, and mentored a week-long research project for four undergraduate students (1 ME, 2 CS, 1 Math) on design optimization via shape morphing. (with C. Mueller)	

8/2020

Mentor, [HerCodeCamp](#) Virtual, UToronto
 Mentored four female-identified high-school students on a two-week-long code camp to build a ping-pong game in Python. (with N. Sultanum)

Invited Seminar Talks

7/2024	AI4CE Lab	New York University
5/2024	Suzumori Laboratory	Tokyo Inst. of Tech.
10/2023	AsiaGraphics Webinar	Online
7/2023	USTC computer graphics summer school	USTC
6/2023	Applied R&D at Foster + Partners	London
5/2023	Design++ seminar series	ETH Zurich
10/2022	Mark Pauly's group	EPFL
11/2021	Justin Solomon's group	MIT
11/2021	Stefanie Mueller's group	MIT
10/2020	Young series: Robotic Fabrication 3	DigitalFUTURES
6/2020	Intelligent Autonomous Systems Seminar	TU Darmstadt
9/2019	Guest lecture at Modeling and Analysis of Structures (1.571)	MIT
4/2019	AIR Seminar of the Hariri Institute of Computing	Boston University
3/2018	Disney Research Zurich	Disney
3/2018	Institute of Technology in Architecture	ETH Zurich
11/2017	Simple Person's Applied Math Seminar (SPAMS)	MIT
11/2017	Computer Graphics Seminar	MIT
4/2017	Brian Williams's group	MIT

Athletics Program Involvement

2022-2023	Member of Nestlé FC	Vevey, CH
2022-2023	Member of Vevey Sport FC 3rd team	Vevey, CH
2017-2022	Member of BKP FC	Boston
2016-2022	Member and captain (2019) of Chinese Scholar and Student Association (CSSA) Soccer Team	MIT
